Summary

Senior Full-Stack Developer with **4+ years** in the JavaScript ecosystem (React, Next.js, Vue, TypeScript, Node.js), building data-heavy enterprise SaaS end to end, from PostgreSQL and Node APIs to fast, typed React interfaces. Experienced with AI-powered products, Large Language Model (LLM) integration, context engineering, and AI-assisted development.

Skills

Frontend Development: React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, Zustand, Context API, TanStack Query, Axios, Astro, HTML5, CSS3

Backend Development: Node.js, PostgreSQL, REST APIs, Real-time (SignalR, WebSockets)

AI & GenAI: Large Language Model (LLM) Integration, OpenAI API, AI Agents & Agentic Workflows, Model Context Protocol (MCP), Context Engineering, Prompt Engineering, AI-Assisted Development (Claude Code, GitHub Copilot)

Cloud & Deployment: AWS (Lambda, S3, EFS, EC2), Cloudflare Workers, Docker

UI / Styling: Material-UI (MUI), Tailwind CSS, SASS/SCSS, Responsive Design

Build & Tooling: Webpack, Vite, Git

Quality & Performance: React Testing Library, Vitest, Core Web Vitals, Performance Optimization, Bundle Optimization, SEO

Accessibility & Security: WCAG Standards, ARIA Implementation, XSS/CSRF Prevention

Soft Skills: Agile Methodologies, Team Collaboration, Problem Solving, Communication

Experience

Senior Software Developer, ThinkSys Inc, Noida

Apr 2022 – Present

Dwellworks (Corporate Relocation & Destination Services Platform) | Team Size: 12

An enterprise corporate-relocation platform (internally, Odin) that manages an employee's entire international move, from home and school finding through lease, visa, tenancy, and departure.

- Owned Odin's front end, the flagship relocation app, delivering 20+ feature modules in React and Vue.js.
- Managed application state (Redux, React Hooks) and the Axios data layer powering every screen.
- Built a server-to-client hydration layer and migrated legacy server-rendered pages into componentized React.
- Delivered real-time notifications and in-app messaging with SignalR for consultants and relocating families.
- Optimized a large legacy front end with Webpack code-splitting and cross-browser support down to Internet Explorer 11 (IE11).

Tech Stack: React, Redux, Vue.js, TypeScript, JavaScript (ES6+), Webpack, SignalR, REST APIs

CloudForestX (Cloud Cost Optimization Platform) | Team Size: 6

A multi-tenant cloud cost optimization platform for AWS, managing 200+ enterprise accounts with cost visualization, idle and unused resource detection, rightsizing, and reservation recommendations.

- Built the React and TypeScript SPA that turns multi-account AWS cost data into real-time analytics dashboards.
- Developed the data-visualization layer (charts, gauges, geo maps) from Figma as responsive React components.
- Created account-onboarding flows and global account and date-range filtering across the dashboard.
- Contributed Node.js and PostgreSQL API endpoints that aggregate and serve cloud cost data to the front end.
- Cut initial bundle 40% and reached 95+ Core Web Vitals via code-splitting, lazy loading, and TanStack Query.
- Shipped the idle-detection and rightsizing UI surfacing savings across EC2, Lambda, EFS, and S3.

Tech Stack: React, TypeScript, Redux, Zustand, Context API, TanStack Query, Axios, Webpack, Node.js, PostgreSQL, AWS

DentScribe (AI-Powered Dental Documentation Platform) | Team Size: 10

An AI-powered healthcare SaaS for dental practices that converts patient visits into signed SOAP notes and writes them back into the practice management software, saving 40-50 minutes per visit.

- Built the portal surface for reviewing and signing AI-generated SOAP notes, from recording to PMS writeback.

- Developed the SOAP report editor with dynamic sections, inline find-and-replace editing, and periodic charting.
- Delivered the appointment calendar with operator filtering and a multi-stage review workflow.
- Shipped the admin portal for user and subscription management, trials, and per-model AI cost tracking.
- Structured the portal on 10 Redux Toolkit slices with role-gated routing and global 401 auth middleware.

Tech Stack: React, Redux Toolkit, TypeScript, JavaScript, Material-UI (MUI), NestJS, PostgreSQL, AWS S3, OpenAI API

MyWorkMyDay (HR Management System) | Team Size: 7

An HR management SaaS serving 20+ business clients with employee management, payroll processing, and performance analytics.

- Built the platform's core surfaces: employee dashboard, payroll processing, and analytics views.
- Created reusable, typed React components and custom hooks for form validation and data fetching.
- Implemented role-based access control (RBAC) with authentication and authorization across user roles.
- Cut API calls 50% and load time from 3.2s to 1.1s with debounced search and memoization (React.memo, useMemo).

Tech Stack: React, React Hooks, Redux, TanStack Query, Material-UI (MUI), TypeScript

Projects

GradeJar

gradejar.com

Local-first gradebook web app for teachers. A no-login, browser-persisted gradebook with rosters, assignments, and custom grading scales, running entirely client-side with zero backend.

Tech Stack: Astro, TypeScript, Cloudflare Workers

JsonBeam

jsonbeam.com

Fast, ad-free JSON formatter and validator. Built static-first for sub-second loads and search visibility, deployed on the edge.

Tech Stack: Astro, TypeScript, Cloudflare Workers

Education

Full Stack Web Development, Masai School

Jul 2021 – Apr 2022

- Specialized in MERN Stack and JavaScript ES6+ with hands-on experience in 11+ major and minor projects.
- Developed end-to-end solutions across frontend, backend, databases, and deployment.
- Demonstrated strong proficiency in React, React Hooks, Node.js, Express, MongoDB, REST APIs, Git, and Agile workflows.

Bachelor of Technology (B.Tech), Marwadi University, Rajkot

Aug 2013 – Jul 2017

- CGPA: 7.15 / 10

Certifications

GitHub Copilot Beginner to Pro – Udemy (Aug 2025)

Edchart Certified React JS Developer (SME) – Credly (Jul 2025)
