Summary

Senior Software Developer with **4.5+ years** in the JavaScript ecosystem (React, Next.js, Vue, TypeScript, Node.js), building data-heavy enterprise SaaS end to end, from PostgreSQL and Node APIs to fast, typed React interfaces. Experienced with AI-powered products, Large Language Model (LLM) integration, context engineering, and AI-assisted development.

Skills

Frontend: React.js, Next.js, Vue.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Context API, React Hooks, Astro, HTML5/CSS3

AI & GenAI: Large Language Model (LLM) Integration, OpenAI API, AI Agents & Agentic Workflows, Model Context Protocol (MCP), Context Engineering, Prompt Engineering, Subagent Orchestration, AI-Assisted Development (Claude Code, GitHub Copilot)

Backend & Data: Node.js, NestJS, Express, REST APIs, PostgreSQL, Sequelize, TypeORM, Real-time (SignalR, Socket.IO)

UI & Visualization: Material-UI (MUI), Tailwind CSS, SASS/SCSS, ECharts, Recharts

Cloud, Tooling & Practices: AWS (EC2, S3, EBS, EFS, Lambda, CloudWatch, STS), Cloudflare Workers, Docker, Webpack, Vite, Git, Agile Methodologies

Quality & Performance: Vitest, Core Web Vitals, Bundle Optimization, WCAG / ARIA, SEO

Experience

Senior Software Developer, ThinkSys Inc, Noida — Apr 2022 – Sep 2026

Dwellworks (Corporate Relocation & Destination Services) | *Team Size:* ***12***

A US-based enterprise corporate-relocation platform that manages an employee's entire international move, from home and school finding through lease, visa, tenancy, and departure.

- Shipped React features across 20 independent SPA bundles in a server-rendered .NET Razor app.
- Built the operations dashboard: Redux, SignalR, auto-reconnect, state recovery.
- Form fields, virtualized selects, data grid and Maps views in the 78-file shared library.
- 7 layered React error boundaries and a stack-trace logger. One bad cell no longer kills the page.
- Google Analytics 4 virtual pageview tracking across the React surfaces.
- Worked directly with the US client in an Agile environment: demos, sprint ceremonies, releases.
- AI-assisted development day to day: self-built Claude Code agents, prompt and context engineering.

Tech Stack: React, Redux, Redux Thunk, Vue.js, JavaScript (ES6+), Webpack, SignalR, Google Maps API, Google Analytics 4, REST APIs

CloudForestX (Cloud Cost Optimization Platform) | *Team Size:* ***6***

A multi-tenant cloud cost optimization platform for AWS, managing 200+ enterprise accounts with cost visualization, idle and unused resource detection, rightsizing, and reservation recommendations.

- Rewrote the legacy React class components from scratch as functional components with hooks.
- Built the React and TypeScript SPA behind 40 cost dashboards, in 470 typed source files.
- Architected global account and month filters in Redux Toolkit: one selection, 40 dashboards.
- Node.js ingestion pulling EC2, EBS, S3 and CloudWatch across 200+ accounts via STS roles.
- 18 scheduled jobs normalize it into PostgreSQL with Sequelize, served over Express.

- Charts, gauges and geo maps on ECharts and Recharts, behind one chart hook.

Tech Stack: React, TypeScript, Redux Toolkit, Context API, Axios, ECharts, Recharts, Material-UI (MUI), Socket.IO, Node.js, Express, PostgreSQL, Sequelize, AWS SDK

DentScribe (AI-Powered Dental Documentation Platform) | *Team Size:* ***10***

A US-based AI-powered healthcare SaaS for dental practices that converts patient visits into signed SOAP notes and writes them back into the practice management software, saving 40-50 minutes per visit.

- Built the review surface for AI-generated clinical notes, with per-section editing.
- Integrated the portal against a queue-backed AI generation pipeline and its writeback.
- AI cost dashboards that track Large Language Model (LLM) token spend per practice.
- 19 surfaces, four user roles, multi-tenant: the React and TypeScript portal.
- Built NestJS services on PostgreSQL: a REST API, three SQS-driven workers for AI note generation, and scheduled jobs for SOAP note writeback.
- Worked with the US client on requirements, demos, releases and cross-team API contracts.

Tech Stack: React, TypeScript, Redux Toolkit, Material-UI (MUI), MUI X Data Grid, Stripe, Axios, NestJS, TypeORM, REST APIs, PostgreSQL, AWS S3, AWS SQS, OpenAI API

Projects

GradeJar gradejar.com

Local-first gradebook for teachers. No login, no backend, everything persists in the browser.

Tech Stack: Astro, TypeScript, Cloudflare Workers

JsonBeam jsonbeam.com

Fast, ad-free JSON formatter and validator. Static-first and deployed on the edge.

Tech Stack: Astro, TypeScript, Cloudflare Workers

Education

Full Stack Web Development, Masai School Jul 2021 – Apr 2022

- MERN stack and JavaScript ES6+, across 11+ major and minor projects.
- End-to-end builds: frontend, backend, databases, deployment.

Bachelor of Technology (B.Tech), Mechanical Engineering, Marwadi University, Rajkot Aug 2013 – Jul 2017

Certifications

GitHub Copilot Beginner to Pro – Udemy (Aug 2025)

Edchart Certified React JS Developer (SME) – Credly (Jul 2025)
