Summary

Senior Software Developer with **3.8+ years** building scalable React and Next.js applications. Expertise in Javascript, React, TypeScript, and Node.js with proven success delivering high-performance SaaS solutions. Strong focus on accessibility compliance, performance optimization, and cross-functional team collaboration.

Skills

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Context API, Zustand, TanStack Query, Axios, HTML5, CSS3

Backend Development: Node.js, PostgreSQL, RESTful APIs

UI/Styling: Material-UI, Tailwind CSS, SASS/SCSS, Responsive Design

Development Tools: Webpack, Vite, Git, AWS, Docker

Quality & Performance: React Testing Library, Vitest, Performance Testing, Core Web Vitals, Bundle Optimization

Accessibility & Security: WCAG Standards, ARIA Implementation, XSS/CSRF Prevention

Soft Skills: Agile Methodologies, Team Collaboration, Problem Solving, Performance Optimization, Continuous Learning, Communication

Experience

Senior Frontend Developer, ThinkSys Inc, Noida

Apr 2022 – Present

CloudForestX (Cloud Cost Optimization Platform) | Team Size: 6

*A cloud cost management platform managing **200+** enterprise AWS accounts with cost visualization, idle resource detection, and rightsizing recommendations.*

- Built React-TypeScript platform processing large AWS datasets via RESTful APIs, delivering real-time cost analytics and intelligent rightsizing recommendations.
- Optimized performance using TanStack Query caching, code-splitting, and lazy loading (React.lazy/Suspense), reducing bundle size by 40%.
- Developed Node.js/PostgreSQL backend APIs for AWS cost data aggregation, enabling seamless frontend integration and data consumption.
- Implemented Webpack optimization strategies achieving Core Web Vitals scores of 95+ and 35% bundle size reduction.
- Collaborated with designers to convert Figma designs into pixel-perfect, responsive React components aligned with product specifications.

Tech Stack: React, Redux, Zustand, TypeScript, Context API, Axios, Webpack, Node.js, PostgreSQL, AWS

DentScribe (AI-Powered Dental Documentation Platform) | Team Size: 10

*An AI-powered healthcare SaaS application serving dental practices, converting dentist-patient conversations into SOAP notes and saving **40-50 minutes** per patient visit.*

- Built comprehensive calendar view with real-time appointment management, operatory filtering, and multi-state workflow (Start, Continue, In Progress, Review, Reviewed) handling concurrent user scenarios.
- Implemented complex SOAP-R report interface with dynamic sections, real-time editing capabilities, find-replace functionality, and auto-generation of After Care Summaries and Perio Charts.
- Integrated AWS S3 for audio chunk storage, AI-powered transcription via OpenAI Whisper API, and automated SOAP note generation using ChatGPT with custom dental terminology prompts.
- Developed admin portal featuring user management, subscription handling, trial user creation, and batch processing dashboard with analytics and performance metrics.

Tech Stack: React, Redux, TypeScript, NestJS, PostgreSQL, AWS S3, OpenAI API

MyWorkMyDay (HR Management System) | Team Size: 7

*A comprehensive HR management SaaS platform serving **20+** clients with employee management, payroll processing, and performance analytics.*

- Developed HR management SaaS featuring employee dashboard, payroll processing, and analytics, improving

operational efficiency by 40%.

- Built reusable TypeScript React components with custom hooks for form validation and data fetching, increasing user engagement by 35%.
- Implemented role-based authentication and authorization with React state management, ensuring secure access control across user roles.
- Optimized data workflows using debounced search and memoization (React.memo, useMemo), reducing API calls by 50% and load time from 3.2s to 1.1s.

Tech Stack: React, React Hooks, Redux, TanStack Query, MUI, TypeScript

ThinkSys Website | *Team Size: 3*

Corporate website for a software development and QA services company delivering end-to-end engineering solutions.

- Developed responsive Next.js website with SSR and optimized React Query caching, significantly improving page load time and performance.
- Implemented SEO best practices including dynamic meta tags, structured data, and semantic HTML for improved search visibility.
- Collaborated with designers to translate Figma designs into pixel-perfect, reusable React components using SCSS.

Tech Stack: Next.js, React Query (TanStack Query), SCSS

Education

Full Stack Web Development, Masai School

Jul 2021 – Apr 2022

- Specialized in MERN Stack and JavaScript ES6+ with hands-on experience in 11+ major and minor projects.
- Developed end-to-end solutions across frontend, backend, databases, and deployment.
- Demonstrated strong proficiency in React, React Hooks, Node.js, Express, MongoDB, REST APIs, Git, and Agile workflows.

Bachelor of Technology (B.Tech), Marwadi University, Rajkot

Aug 2013 – Jul 2017

- CGPA: 7.15 / 10

Certifications

GitHub Copilot Beginner to Pro – Udemy (Aug 2025)

Edchart Certified React JS Developer (SME) – Credly (Jul 2025)
